Company: IX Online (Pty) Ltd.

Location: South Africa

Category: other-general

These jobs were popular with other job seekers Schlemmer & Associates Recruitment Specialists Schlemmer & Associates Recruitment Specialists As the AI Researcher, your primary responsibility will be for researching AI programs and solutions that have already been developed and providing feedback to department heads on how these technologies can be implemented to enhance departmental efficiency. You will work closely with our cross-functional teams to develop and deploy AI solutions tailored to our specific needs. It is a hybrid position requiring a self-equipped workstation with a personal computer and a reliable internet connection from home, with occasional in-person meetings at our Westville office. What you will do Analyzing AI technologies and assessing their potential impact on departmental efficiency. Collaborating with internal stakeholders to understand their needs and identify opportunities for implementing AI across various departments, including operations, finance, and customer service. Researching AI models, algorithms, and systems to automate tasks, streamline processes, and improve decision-making. Providing recommendations and feedback on the implementation of AI solutions. Working with cross-functional teams to ensure successful implementation and integration of AI solutions. Staying updated with the latest advancements in AI and industry best practices to drive innovation and maintain a competitive edge. Communicating findings, insights, and recommendations to key stakeholders through reports, presentations, and demonstrations. Integrating AI capabilities into existing systems and applications while ensuring compliance with data privacy and security regulations. You will need to get the job done Bachelor's degree in Computer Science, Engineering, Data Science, or related field Proven experience in AI research, machine learning, and data analysis.

Strong knowledge of AI algorithms, frameworks, and tools. Experience with programming languages such as Python, Java, or C++, and familiarity with machine learning frameworks is an advantage (e.g., TensorFlow, PyTorch). Excellent analytical and problem-solving skills, with the ability to translate business requirements into technical solutions. Familiarity with data privacy and security regulations. Strong communication and collaboration skills, with the ability to work effectively in a team environment. Prior experience in implementing AI solutions for workplace efficiency or process automation is a plus.

Who we are and what we do  
Who we are: iX Online is a proudly South African and independent digital solutions company that specializes in website design, vehicle stock solutions and digital marketing. With over 20 years of experience, we help businesses maximize their potential by using the internet as a tool to generate and manage leads, analyzing sales, and communicating with customers. Our web design and support center is located in Durban, with additional support personnel based in Gauteng, Port Elizabeth, Bloemfontein, and Cape Town.

What we do:  
Web Design. We offer the best web design solutions on the market. Built to not only attract customers but also keep them engaged, our website design services are a must for all businesses.  
Smart Manager. A suite of online tools and services to manage your stock, leads and customers. All geared to generating more leads and converting those leads into sales.  
Amplify360. An exclusive online digital marketing agency. Generating online enquiries through various social media and online channels. Best of class in terms of combined lead quantities, quality and cost-effectiveness.
